

Dealer Support

We at Fibre Processing value our relationship with our customers.

That's why we fill orders quickly (typically 10 days).

Rush orders and delivery services are available.

All futons are made to ensure our customers a consistent, reliable product.

Our mattresses are then bagged to protect against damage during shipping.

All of our futons are shippable worldwide (UPS or Fed Ex) providing you the most flexible of delivery options.

OUR FUTONS

Our Futons are made from :

Fibron™ Cotton Batting.

For over 100 years, we have blended the highest quality cotton to produce our exclusive Fibron II™ cotton batting. Our high standards ensure that Fibron II™ batting is both soft and comfortably firm. The result is a futon mattress that provides a great deal of loft and support.

Fibre Foam

In **2002**, we began to manufacture, through an air-lay system, our own high quality Fibre Foam pad **2"** thick with a density of **2.8** and the longevity twice that of regular polyurethane foam. The process still continues today with a variety of Fibre Foam thicknesses for the most comfortable and durable foam pads for our mattresses.

Innersprings

Our quality Innersprings are constructed using hardened steel in both **13.5** and **13** gauge wire. Our **IS-5** is manufactured with a **13.5** gauge spring for solid support. Using the **13** gauge spring allows for a firmer feel to our **IS-9** mattress.

The encased coil unit combines a quality that furnishes excellent support and
Comfort.

OUR MATTRESSES CONFORM TO AND PASS ALL FEDERAL FLAMMABILITY STANDARDS

Our Mattresses

Available Sizes: Twin, Full and Queen

SPIRIT

- **6"** Mattress available with a single **5"** Fibre Foam surrounded by our Fibron II™ cotton batting. This mattress is available in Black only.

LIBERTY

- **8"** Mattress created with two **5"** Fibre Foam Pads that are layered by our Fibron II™ cotton batting.

PREFERRED INNERSPRING

- The Preferred Innerspring Mattresses are offered in two models tailored to your comfort. Both the **IS-5** and the **IS-9** are constructed using two Fibre Foam Pads and our Fibron II™ cotton batting. The **IS-5** features a **13.5** gauge spring for support, while the **IS-9** uses a **13** gauge spring for a firmer feel. For additional support, we manufacture encased coil models with either two Convolved Foam Pads or two Fibre Foam Pads surrounded by our Fibron II™ cotton batting.

FREEDOM

- **10"** Mattress that is designed with two **3"** bonded Poly Pads and one **5"** Fibre Foam Pad encased by our Fibron II™ cotton batting.

INFINITY

- This premier **9"** mattress is constructed using three separate **2"** Fibre Foam pads layered by of our Fibron II™ cotton batting.

TENDER TOUCH

- Our **9"** mattress that is constructed using two **5"** Fibre Foam pads and adding extra Fibron II™ cotton batting for ultimate thickness.
